EDUCATION

New Jersey Institute of Technology

MS in Data Science, Computational Track | GPA 4.0/4.0

Newark, NJ

Expected Dec 2026

CUNY Baruch College

BBA in Computer Information Systems | GPA 3.6/4.0

New York, NY

May 2025

TECHNICAL SKILLS

Data Analysis & Modeling: SQL, Python, Excel, Pandas, Scikit-learn, Forecasting, Data Validation, Trend Analysis

Business Intelligence & Reporting: Power BI, Tableau, DAX, Matplotlib, Executive Dashboards, KPI Reporting

Data Platforms & Automation: SQL Server, APIs, Power Automate, SharePoint, ServiceNow, Git/GitHub

Certifications: [Google Data Analytics Specialization](#)

WORK EXPERIENCE

Metropolitan Transportation Authority (MTA)

Jan 2026 - Present

IT Engineering & Customer Management Metrics Fellow | Data Analytics & Reporting

New York, NY

- Develop executive Power BI dashboards and recurring reports monitoring 10,000+ work items, workload trends, service performance, completion activity, and operational risk across multiple IT functions.
- Analyze historical and current datasets to identify trends, reconcile reporting discrepancies, investigate data-quality issues, and validate KPI logic used in management reporting.
- Perform ad hoc analysis and translate stakeholder questions into KPIs, reporting requirements, and visualizations that support operational decision-making.
- Automate recurring reporting workflows using Power Automate and SharePoint, reducing manual steps and improving the consistency of data preparation and distribution.

NYC Department of Transportation

Jan 2024 - Aug 2025

Data Analyst

New York, NY

- Analyzed Locker NYC utilization, demand, geographic activity, and time-based usage trends to evaluate program performance and support operational decisions.
- Built SQL and API-driven pipelines to automate data ingestion, transformation, validation, and preparation for recurring analytical reporting.
- Developed Power BI dashboards and recurring performance reports that enabled stakeholders to monitor demand patterns, utilization, and program activity.
- Investigated data inconsistencies and reporting gaps through ad hoc analysis, translating findings into recommendations for technical and program teams.

PROJECTS

JetBlue Passenger Demand Forecasting & Capacity Planning Analysis

- Analyzed historical passenger traffic, seat capacity, departures, load factor, and route-level trends using U.S. DOT/BTS airline data with SQL and Python to identify seasonal demand and capacity patterns, evaluate changes in utilization over time, and support data-driven planning and forecasting.

E-Commerce A/B Testing & Conversion Analysis

- Designed and analyzed an A/B test comparing control and redesigned e-commerce experiences using Python and SQL, evaluating conversion rate, engagement, and revenue-related KPIs to measure the impact of product changes.
- Applied hypothesis testing and statistical significance analysis to validate experiment results, segmented performance across customer groups, and developed a Power BI dashboard summarizing findings and actionable recommendations.

LEADERSHIP AND PROFESSIONAL DEVELOPMENT

ColorStack Baruch Chapter

January 2024 - May 2025

Marketing Chair

- Led digital promotion and outreach for technical workshops, networking events, and career-development programs, helping increase student awareness and participation in chapter programming.
